White House Conference - Wishes of Chief Executive - Elkins Rebate Proposition.

Washington, Feb. 10.—(Exclusive Dispatch.) On account of his supposed connection with attempts to defeat administration plans supposed connection with attempts to defeat administration plans for anti-trust legislation. Speaker Henderson has been practically deposed as Speaker of the House of Representatives, and up to the close of this session of Congress he will be parmitted only to exercise the nominal powers of that high official. It has been definitely arranged that from now on Henderson will not be called into legislative conferences, nor will he be called to the White House to confer with the President regarding many important pleces of legislation that must be attended to before this Congress adjourns. Such conferences will be held exclusively with Representative Cannon, who, it is assured, will be Speaker of the House in the Pifty-eighth Congress, and he is today complete master of the House, without having been elected Spaaker.

The downfall of Henderson seems to be complete and pitiful. He today declared that he had nothing whatever to do with the Rockefeller plot to squeich the President's plans for reasonable trust legislation, but so many Representatives declare that he was hostile to trust legislation that he has fatally weakened himself with this administration. It is not even hinted nor believed that Speaker Henderses has been guilty of anything more than armathising with the corrections.

soing an ocean mice by anybody in the House or out of it. But so biter is the feeling against him that Representative Fletcher of Minnesota today declared that he would oppose giving the Speaker the customary vote of thanks at the conclusion of this sension of Congress. The mere fact that such a vote is not made unanimous would be about as stinging a rebulke as ever was administered to any Speaker of the House since this government was founded.

INTERVIEW WITH SPEAKER, IBY THE ASSOCIATED PRESS-P.M.1

WASHINGTON, Feb. 10.—The Post tomorrow will publish an interview with Speaker Henderson with respect to reports current about the Capitol connecting his name with efforts to thwart anti-trust legislation and with having endeavored to have enacted a substitute for the Nelson publicity section of the Department of Commerce Bill. The reports also said Speaker Henderson would become attorney for one of the Standard Oil companies after March, when he will retire from Congress. The Speaker emphatically defined the reports. He said: "In the first place, I have never known any person or official connected with the president most consistently since he entered the White House said today: person or official connected with the Standard Oil Company in any way, nor do I know of such official or per-son now."

"And what about your alleged oppo-sition to anti-trust legislation?" was

never been completed and carried out to urge legislation.

"Early this session, I started out to urge legislation against trusts. It was at my suggestion, after a conference with Mr. Jenkins, chairman of the Judiciary Committee of the House, that a special sub-committee was appointed, a sub-committee was appointed, a sub-committee of earnest sincere and independent men—to frame an anti-trust bill. They entered upon their work, and from that day was in frequent consultation with the members of that sub-committee as to the progress they were making. I talked often with Mr. Overstreet, Mr. Jenkins, Mr. Littlefield and others of the Judiciary Committee as to what was being done."

"You are in accord with whatever "You are in accord with whatever programme the administration wishes as to anti-trust legislation."

"Why, I have been in consultation often with the President on these matters," concluded the Speaker, "and ready to work in complete accord with them, as I have been in other matters of legislation before Congress. I was at the White House yesterday, shortly after I o'clock, when we discussed the programme as to the conference on the Department of Commerce Bill, which has just been accepted by the House."

WASHINGTON. Feb. 10.—[Exclusive Dispatch.] A conference of the greatest importance took place in this city today at one of the leading hotels. The conference, it is declared, lasted some time, and the whole question of proposed trust legislation was gone over. The greatest secreev, it is said, was observed in regard to the confab by the men woh took part in it. People about the hotel took pains to deny that such a conference was taking place, and men who were present at it are said to have entered the hotel by one door and left by another.

There is no doubt that the great corporations are seriously alarmed at the turn things have taken in national legislation. They are specially concerned at the effect created by the Rockefeller telegram exposure, and the explanation given by a prominent sensior that the Blandard Oil Company was finting the publicity feature.

They believe that their ferdign rivals to learn the secrets of their operations. They believe that their ferdign rivals interests will be feopardized by the passage of the pending anti-trust bills, and they will fight for what they regard as their just rights.

Today's conference would indicate that they would leave no stone unitured in order to prevent the passage by Congress of obnoxious lexislation. One of the conservative Republican Senators, who is a close friend of the President, when asked today whether the anti-trust bills would become a law at this session, said: "I cannot say; in it is doubtful, in my judgment, it would be very much better for us and for the big corporations if they would keep their people away from Washington."

me that the President might have been content to stand pat on his trust record without trying to crowd Congress into pushing all legislation that bears the White House Hall mark at this session. He is in for it now, and I suppose must have a fight.

"It is a nasty mix-up, which, as a friend of the President, I deeply regret. The corporations certainly have some rights that even our legislators are bound to respect. My own judgment is that a good deal of this antitrust sentiment is manufactured, and that it will be about like free silver and other similar movements."

amendment to the Department of Commerce Bill, the Elkins rebate bill and the Littlefield bill, which was passed by the House Saturday.

Early in the day the President had a conference with Mr. Littlefield. The latter is urging strongly that his measure be taken up and passed by the Benate. He maintains that while the Nelson amendment provides for publicity as to some of the operations of corporations, it does not go so far as his measure, and not so far as Congress ouight to go in the matter.

Later Senators Spooner and Aldrich had extended talks with the President about-trust legislation, With other callers, the President discussed the subject, urging upon all, it is understood, the desirability that Congress shold enact the Nelson amendment, and the Eikins rebate measure. CONFEREES AGREE THEREON.

(BY THE ASSOCIATED PRESS—P.M.)

WASHINGTON, Feb. 10.—The conferees on the Army General Staff Bill reached an agreement today. The retirement provision is eliminated, as it is a part of the Army Appropriation Bill. The section making the chief of artillery a member of the general staff is agreed to, with a provision that he must be appointed and confirmed by the Senate as a brigadier-general.

The number of brigadier-generals of the line is reduced to fourteen, so that the whole number shall be only fifteen. The provision that the chief of staff shall be under the direction of the Secretary of War by direction of the President is retained, as also that provision which makes the act go into effect August 15, 1903, when Gen. Miles retires.

the other of Orlahome and Indian Territory. The compromise pian providing for the admission of New Mexica new, and of Arisons, when it renches a certain population and before that date, if Congress changes its mind, has been abandoned. The Republican policy will be two States or none.

The Democrats are trying to decide what attitude they had better take with this alternative presented to them. They realize that the bon of State-hood may be immediately accorded to the Far Southwest, if they accept the compromise, and that it will be considerably delayed if they do not. They also realize that they may be acceptalso realize that they may be accepting four Senators, when, if they would hold out a little lorger, they might and for the big corporations if they would keep their people away from Washington."

Mr. Richardson of Tennessee treated

Mr. Richardson of Tennessee treated Mr. Richardson of Tennessee treated the matter very seriously. He said that companies were already being formed and circulars were being sent out to ignorant colored people by un-scrupulous adventurers, and he thought both sides should join in an assurance to them not to invest their quarters and dimes in this chimerical scheme.

scheme.

Mr. Cannon responded that all should understand, rich and poor, white and black, cultured and ignorant, that the government promised to all alike equality before the law and equality of opportunity, and under it each must work out his own salvation.

each must work out his own salva-tion.

Mr. De Armond was not satisfied with this statement, but asked for a more specific assurance, and in reply Mr. Cannon stated with embhasis that if the ignorant were being imposed upon, they should be undeceived—that, in his judgment, no such bill could or would pass.

in his judgment, no such bill could or would pass.

At the conclusion of general debate, the bill was read for amendment, under the five-minute rule. An amendment was adopted to appropriate \$30,000 for a lighthouse and fog signal at Southampton Shoals, San Francisco Harbor. It was agreed that on the session Sunday, February 22, eulogies to the memory of the late Representative Moody of North Carolina should be in order. At 5:45 o'clock the House adjourned.

Foreign Affairs, dated La Paz, Bolivia, February ?

"Inaccurate that the Brazilian government has proposed arbitration, that President Pando has refused, answering by sending troops as only way to settle dispute, as affirmed by a cablegram from Rio Janeiro, published by the press. Baron de Rio Branco proposed exchange of territories verbally. Negotiations were at this point: President Pando, learning untenable situation and that the revolutionists were invading the Orton region, committing depredations, decided to go, taking advantage of the expedition already prepared at great sacrifice, expense in launches, etc. This act of defense against revolutionists, which is in no way an aggression on Brazil, was followed by the deciaration of Baron de Rio Branco that the Acre territory was litigious and ordering the Federal troops to take possession of it.

Able Argument in Behalf of the Non-Union Miners.

Rioters Fill Streets of Cadiz-Voluntary Raise of Wages. Engineers' Demands.

(BY THE ASSOCIATED PRESS-A.M.) PHILADELPHIA, Feb. 10.—President Bage of the Reading company was an attentive listener to the arguments presented today before the Anthracite Coal Strike Commission. The non-union miners, through Attorney John T. Lenahan of Wilkesbarre, expressed their disapproval of the prin-ciples and practices of the United Mine Workers. Lenahan, in his argument, presented

three propositions. He submitted that the commission must find the United deprived the non-union miners of their deprived the non-union miners of their lawful right to work; that all authorities agree that the law guarantees to every many the right to work where, when and, for whom he pleases and that nothing could justify a finding by the commission that non-union miners must deal with their employers through the medium of the union, or be subject in the slightest degree to the control or dictation of the union.

After presenting these propositions.

After presenting these propositions, Lenahan said in part:
"It follows as a necessary conclusion from admitting the principle that non-union miners must be permitted to work without unlawful interference from fellow-workmen, that they must not be made to deal with their employers through the medium of the union. In the eyes of the law, no distinction can exist between union of the union of the union was the street of the law. no distinction can exist between union and non-union laborers. They simply afe fellow-servants of a common employer. The majority may make such ployer. The majority may make such secret agreements among themselves as they please. But such agreements cannot affect the rights of the minority, no matter how small it may be. There can be no such thing as the majority rule among fellow-workmen in a common employment. It is the admitted right of a majority of stockholders in a corporation to dictate the policy of the company, even though contrary to the wishes of some stockholders, who might thereby suffer loss. But all the servants of one master remain individuals under our law, and yield nothing of their rights to a majority of their coemployés.

"How, then, could it be possible for this commission to admit the right of

"How, then, could it be possible for this commission to admit the right of the United Mine Workers to contract on behalf of non-union employes with a common employer? If it were possible, is it likely that non-union miners would receive fair treatment at the hands of those embittered by prejudice and anxious to monopolize all the positions they hold? As is well known, there are diametrical differences of opinion on many subjects apparently affecting their common interests between union and non-union men in all occupations. The rules of trades unions are framed on the principle not merely of dictation by the majority to the minority smong fellow-employes of one employer, but of such dictation by the majority of all workmen engaged in a particular occupation.

Majority of Members are Opposed to an Investigation.

Bills to Abolish the Barber ssion-Pay for the National Guardsmen.

SACRAMENTO, Feb. 16.—[Exclusive Dispatch.] Stanton's resolution caling for a nice little junket by a select committee for the ostensible purpose of investigating the business of the Bunset Telephone Company in Los Angeles, San Francisco and other cities, is practically dead. There will be no investigation. This is the opinion of the members of the Committee on Corporations which has the resolution in charge. In that committee Stanton has the support of only one other member, and he would like to let go.

The matter came up today at a

ber, and he would like to let go.

The matter came up today at a meeting of the committee, and because of the presence of Charles M. Seeley, manager for the company in Los Angeles, it was expected that there would be a hot time. The session, on the contrary, was very tame. True, Stanton did not have time to present all that he said he wanted to introduce, but Seeley's explanations brought the majority of the committee to the conclusion that no investigation is needed, and if one were ordered that it would be practically without result. The committee took no final action, but postponed further hearing until some time next week. By that time it will be too late in the session to think of sending away any committee on a trip which might cost the State several thousand dollars, and incidentally be nice picking for those who composed the special committee.

One of the acts of Stanton today was taken as address of the souther the other

be nice picking for those who composed the special committee.
One of the acts of Stanton today was taken as a direct affront by other members of the committee. He had secured a petition signed by more than 200 Los Angeles people requesting that his resolution be passed. It was circulated in Los Angeles by one Van Alstein, and then sent to Stanton, who introduced it, not in the committee, but in the sembly, and secured an order that it be printed in the journal, thus making an official record of his side of the matter and leaving the other side no such opportunity. This the committee did not like, and they plainly said that it was not fair treatment to the committee, or to the other ent to the committee, or to the other de, but the order had been issued and

to investigate it would take two or three weeks for them to learn enough about the intricate workings of the company to make an intelligent report. As an offset to Stanton's petition, Chairman Allen read sixty or more telegrams from business men in Los Angeles saying that since the new switchboard had been installed the service had vastly improved, and that they were satisfied. Among these telegrams was one from W. J. Rouse, former business manager of the Herald, in which that sentiment was expressed.

ich that sentiment was expressed When this was read, Stanton pro-duced a telegram from Hardison, in which it was stated that Rouse had sent the message on his own responsi-

at shows how much there is in telegram," exclaimed Stanton.

"That shows how much there is in that telegram," exclaimed Stanton. The man who sent it has since been fired from the Herald."

Seeley at once took isque with this statement, and told the committee that he knew that Rouse had resigned. Just before the session was concluded, Rolley, one of the members of the committee, asked Seeley whether he knew if Stanton was interested in the opposition company in Los Angeles.

It was easy to see that Seeley's candid explanations of the difficulties under which the company has been laboring impressed the committee with his sincerity, and their refusal to take Stanton's proposition to report the matter back to the Assembly without recommendation, indicated that if it is ever reported it will be with the recommendation that it be withdrawn. or hat it be voted down. Stanton has not given up the fight, but his warm-est supporters now say that his reso-lution is practically dead,

GO AFTER VOGELSANG. EVERE CRITICISM OF HIM.

SAN FRANCISCO, Feb. 10 .- [Excl sive Dispatch.] It was openly charged on the floor of the Assembly this af-ternoon, that Fish Commissioner Vogng had been willfully neglecting

Soward of Sierra was the next to take a crack at the Fish Commissioner. He mentioned no names, but everybody knew whom he meant. "There has been a man here throughout this session," said he, "who is paid well by the State to enforce the game laws, All he has done this year has been to lobby, lobby, lobby, while it is a well-known fact that the game laws are being disregarded in this very city. An additional blow was struck at the Pendleton board by McMartin. Pendleton had secured the passage in the Senate of a bill amending the barbers' bill, and giving the board greater powers. This bill was up for final pas-sage in the Assembly today, and Mc-Martin had it re-referred to the Committee on Commissions and Public Ex-penditures. He declared that he has the backing of nearly every barber in San Francisco to secure a repeal of the law, because the board does the barbers no good and causes them needcharge each of them \$1 more per y-ar for renewals of certificates, and the barbers do not see why they should be so taxed to pay for a purely deco-

Congress provided for this payment, but set a limit on the time within which the claims should be filed, with the result that many of the soldiers who were in the Philippines did not have an opportunity to present their claims.

Prescott's bill provides that \$35,000 shall be appropriated for the purpose, and all the claims paid. Then the State shall make a claim against the, government. The effect of this would be to have the State shoulder the

Senator Shortridge of Santa Clara introduced a bill in the Senate to declare the Associated Press and similar associations "common carriers." The bill provides penalties for discrimination between patrons, and refusal to serve any one with report.

The labor question cropped up in the Senate again when the bill relating to the rights of employers came up for second reading. The motion of Senator Raiston that the bill be refused enrollment and third reading created a lively dispute, which finally resulted in a vote ordering the measure to the third reading file.

Those who advocate convict labor sustained a blow today, when the Senate bill directing that at least twenty prisoners at San Quentin and Folsom be employed on the roads near the penitentiaries was refused passage in the Assembly.

Prescott saved Vogelsang from a further roasting from that source, by making the point of order that the speaker was not addressing himself to the question under discussion, but a moment later Dougherty took up the cudgel and applied it to the Fish Commissioner with equal vigor.

"When I came here," said he, "I had the idea we were sent here to serve the wishes of the people, but instead I find the Fish Commissioner here doing what—not his duty for which he is paid, not attending to his own business; but instead, trying to influence members not to do what the people want. But for his efforts, the State would be divided into fish and game districts as the people demand."

This action was taken after a report had been tendered in favor of Wanzer by the Committee on Contested Elections. A minority report was filed by Finn and Dunbar, Democrats, in favor of Duffey, but it was ignored.

Reconsideration was given to Lumley's constitutional amendment, exempting \$300 worth of personal property from taxation, which was deleated yesterday afternoon. After the reconsideration had been carried by a vote of 59 to 19. Lumley offered an amendment reducing the amount of property to be exempted from \$300 to \$200. The reduction received the sanction of the Assembly, and the constitutional amendment passed.

The famous Works Irrigation Bill was introduced in the Assembly this morning by Walker of Los Gatos. Other bills introduced were:

Kidnaping Her Child is the Charge Against Him-In Jail Last Night.

Hugh W. Bryson was again arrested t a late hour last night at the insti-ation of Miss Pricilla Catherine How-i. of Memphis, Tenn., on the charge of kidnaping her illegitimate baby.

The reopening of the notoroius and sensational case is the result of Miss

Howell's untiring work back in Tennesses, whither she went immediately after Bryson's release from custody here last November. The arrest was made on a telegraphic order Sheriff Blackwell of Selby county, Tenn., stating that Bryson had been indicted by the grand jury for kid-

Bryson was nabbed by Deputy Sheriff Harry Saphir of the Elms Detective
Agency as he emerged from the Orpheum with a young woman on his The private detectives here in

pneum with a young woman on ais arm. The private detectives here in the employ of Miss Howell have been expecting a telegraphic warrant for several days, and Saphir kept such close watch on the movements of Bryson that the young man was located and arrested immediately upon receipt of the telegram.

Bryson was taken to the County Jail, and, demanded release on ball or immediate arraignment, and the fixing of bonds. The jailers refused. The prisoner summoned Attorney Rodman and Under Sheriff Yonkin was awakened and called to the jail, in the absence of Sheriff White. The jail office was then the scene of a spirited controversy, Detectives Elms and Saphir contending that a prisoner arrested on telegraphic warrant must be held until the arrival of an officer, and Attorney Rodman demanding immediate arraignment before a magistrate. Yonkin communicated with the Sheriff's attorney, and stood firm against releasing Bryson.

The telegraphic advices state that an

REFINED SUGAR MARKET.

Particularly Unsatisfactory in Condition at New York-Wholesale Grocer Selling Out Their Accumulations. IBY DIRECT WIRE TO THE TIMES.

NEW YORK, Feb. 10.-[Exclusive Dispatch.] The refined sugar market is in a particularly unsatisfactory con dition. Throughout the beet sections in the West, the beet manufacturers are underselling the eastern refiners fully ten points. On the Pacific Coast reduction of 15 cents per hundred bounds was announced, making the quotation 4.25, which compares with 4.65 net in New York, and in the East the wholesalers are selling to retail-ers at refiners' net prices. One effect of this condition has been the renewal of shipments of refined sugar by the Southern Pacific from San Francisco to New York. Of this sugar, between 2000 and 2500 tons of granulated have been shipped by the Crockett refinery, and aside from that, it is understood that the wholesale grocers of San Francisco have also shipped a number of involces in order to take advantage of the higher prices that, it is ex-

up of sugar last November by sale grocers at a long price of about 4.45. Between November 7 and December 9, there was an advance of fully ½ cent per pound, and there has since been a reduction of 19 to 15 points. The wholesale grocers are now said to be selling out their accumulasaid to be selling out their accumulations as far as possible, and taking their profits, and this is actively inter-fering with new business from refin-crs. As explained by a prominent local crs. As explained by a prominent local refiner today, the delay in ratifying the Cuban reciprocity treaty is a particularly depressing feature in the situation. The Cubans have become discouraged over the prospects of receiving the benefit of any concessions on their present crop, and are now offering their raw sugars at 4 cent per pound below the world's price establishment.

The explanation of the reported suspension of payment on the company's local office as strong proof that the big turf and poolroom operators are well on their feet, and have no idea of going out of business.

The explanation of the reported suspension of payment on the company's statements, reserves the right to demand a thirty-day notice prior to withdrawais by subscribers, and that, on account of the scivity of other firms of the same nature, which have lately sprung up and enticed away a number of Arneld's patrons by an offer of 5 per cent, the company has evidently made use of the thirty-day provision as a matter of self-protection against the sudden withdraw-ais.

SAN FRANCISCO, Feb. 10.—Summer weather prevailed at Ingleside today, and the track was in fairly good condition. The favorite-followers met with disaster. The main attraction was the seven-furiong handicap. Princess Titania was favorite, while Kenilworth receded in the betting. To a good start, Beau Ormonde went out in front, but before the stretch was reached Kenilworth had assumed the lead. Shaw gave him a perfect ride, and he won easily from Beau Ormonde and Gravina. Princess Titania made a disappointing showing. Mechanus, favorite for the last race, was interfered with by Little Magaret, and as a result was beaten in a drive by Golden Light, an outsider. It appears from Gov. Taft's cablegram that the Philippine commissioners are unanimous in their indorsement of the plan suggested. Inasmuch as they are on the ground, and familfor with the needs of the situation in with the needs of the situation, it would probably be well for Congress to comply, so far as possible, with their recommendations. The time will come when the American currency system will be extended to the Philippine Islands, as it has been extended to the Territory of Hawaii. Perhaps that time for such action has nearly set arrived although it is not appeared to the congress of the congres not yet arrived, although it is not apparent that the derangement of busiss would be other than temporary if the measure pending in Congress a law. a thousand trees were planted on three of the public highways leading from that city, under the auspices of the Arbor Club, the work being done by volunteers. Not only were the trees planted, but most of them were protected by tree boxes. The entire length of roadway planted was about nine miles. The day was a local holiday, and thousands of people turned out to participate in the work, despite the discomfort of prevailing fog. In addition to the active members of the Arbor Club, the Native Sons and Na-tive Daughters of the Golden West, the Elks, Redmen, Foresters, and other fraternal organizations turned out in numbers to plant trees, and the different schools, the teachers, social clubs, and society generally made it a tree-planting event. A dispatch reports a story to the effect that the brakeman ser to flag the train in the rear fell to fing the train in the rear fell asleep. An interesting fact in this connec tion is the news, published in The Times of Sunday, that the great Chlcago and Northwestern system has issued orders which will result in a general day of rest on Sunday, for all its employés. Not a ton of dead freight, except coal, will be moved on Sunday, and all switchmen and yard crews, except those necessary to han-dle perishable freight, will be given their time between 7 a.m. and 7 p.m. The management of the road expres ample will be followed by other sys tems. The officials say that the stimulus of one day's rest will result in a greater amount of freight being handled in six days than is now han-dled in seven. The result of the Northwestern's radical experiment will be watched with much interest. Meantime, however, whatever may be the opinion in regard to the desirability or practicability of making such a reduction of Sunday labor, there can b no question whatever that we should ing for more than a reasonable num-ber of hours of men upon whose alert-

REACHING THE LIMIT.
The latest novelty in the way of

the strike comes appropriately from Chicago, a city that is more cursed possible exception of San Francisco. In this case, it is the elevator men in the tall office buildings that have gone on a strike. On Monday it was expected that a general strike would be ordered, involving nearly all the when not only the janitors, but the levator starters, window washers and scrub women would take a vacation. t was also expected to include the ocal teamsters, as the latter have een ordered by their union to refuse o deliver fuel at any buildings where the men, are out.

It was intimated, in a previous dis-patch, that the real cause of this strike is an attempt on the part of the coal dealers to force the ownlusively for fuel, in place of petroeum-which has been rapidly growng in popularity—and natural gas This rumor appears to be confirmed by a statement that the teamstern have demanded that coal be used in the buildings all the year round, and that all pipes for transmitting natural gas or oil be removed.

Thus, we see a new evolution of the strike idea-one set of business men using the strike as a club to burt the business of their competitors. We may next expect to see the waiters' union demanding that only cane sugar shall be used in the restaurants and notels, the carpenters' union forbid ding the use of California redwood, the brewers' union refusing to handle Washington hops, and so on ad infinitum and ad nauseam.

Is it not about time that this preposterous, demoralizing and un-American sort of thing should be brought to an end?

That European scandal involving the Crown Princess of Saxony has become a tragedy that must; in some sense, touch the most calloused heart. However much we may inveigh against the acts of the Princess in abandoning her children and taking up with a paramour it is pitiful to note her present condition. The miserable creature calling himself a man has abandoned Louise to her shame, her child is dying and she is not permitted to return to it, and the whole world—a world that is full of sinners who haven't yet been found out—is holding up its hands in holy horror and turning against her. Little wonder then that the heartbroken mother, the disgraced woman, the abused wife, should try to end it all with a swift bullet. "The way of the transgressor is hard," but it does seem as if poor, unhappy, "The way of the transgressor is hard," but it does seem as if poor, unhappy, scandalized and disgraced Louise of Saxony were having a "way" that is almost too hard.

If Col. Black is still poolrooming out in the "scruburbs," why it is? We have a Board of Supervisors and there-seems to be no good reason why that body should not be quite as virtuous and zealous for civic decency as a City-Council. If the poolroom is a nulsance and an evil in town it is no less a nulsance and an evil just beyond the town's confines. Now that the blackboard upon which is registered the racing figures has been started on the move, it ought to be kept moving. The people in the country have the same right to demand protection against gamblers and other malefactors that dwellers within the gates of the city have. It is entirely in order for the Soard of Supervisors to rise up and

The presumption is that his boat will never leave the shore until the snake medicine is properly stored under the rear seat and the single worms are gently reposing in a separate can. As for the country, it much prefers to see Grover watching the bob on his line rather than to witness his expertness as a destroyer of prosperity. We trust that the fishing will be found better in Florida than the bear hunting was in Mississippl, a while back.

The movement to secure an elastic currency still continues. But what matters it. Mr. Carnegle, John Rockefeller and Pierp Morgan will get the stuff whether it stretches or not. What this country needs is not an elastic currency so much as some variety of the aforesaid that stretches more from hand to hand, instead of from one hand to the other hand of the same handler.

"A Practical Suggestion"—Is It?

LOS ANGELES, Feb. 2, 1903.—[To the Editor of The Times:] As no one has yet offered a practical suggestion in regard to aboishing the social eugent to suggest the following plan:

will enforce the law, keep a close watch, and bring the offenders to justice.

We are told that efforts have been made before to abolish this evil without success, but the 'uth is that an effort has never been made to pass a severe law against this evil, and the punishment for conducting a house of prostitution has been too light—merely a fine, which amounts to almost the same thing as a license, and I have never heard of a law to punish the patrons of these houses. Give us the right kind of policemen, and it will be very hard for anyone to carry on this disgraceful business. In speaking of houses of prostitution, I am referring to all kinds of houses of prostitution, and not merely the poorer class of them. The sin is just as great in an elegant house of evil as in a poor one. Some people eyen seem to have an idea that the only sin committed by the male patrons of these houses is in contracting disease, but it is perfectly plain to all right-min'tel and logical people that such a disease is merely the punishment for the sin, and is not the sin itself. The houses which profess to guard against the consequences of sin are more evil that the other class, as they encourge vice.

After having expended something like \$25,000 in the exploitation of the Mineral Belt group of mineral claims, which lie in the southeast part of Yuma county, Ariz, the Arizona Development Company has just spid the property for \$150,000.

property for \$150,000.

For almost two years development work has been carried on under the supervision of Dr. O. L. Geer of Martines, and the claims, which are a few miles from the famous Congress propulsing a general and appropriate and the second of t

miles from the famous Congress property, are now regarded as a promising gold property.

The purchase was made by the Harqua Hala Mining and Milling Company, organized for the burpose of taking over mises. It has a strong backing of Philadelphia capital, and the intention is to install minchinery that will enable the company to handle a large tonnage. There are said to be over 200,000 tons of ore in sight, and about 50,000 tons already blocked out. The average of numerous samples gives a value of \$25 a ton to the ore.

of being sent overland at greater ex-pense as is now the case. Already a number of large Mexican operators have agreed to ship ore to the new plant as soon as it is ready for busi-ness.

LANCASTER PLACER FIELD.

A systematic attempt is soon to be made to develop the new and promising placer field recently discovered in Antelope Valley, fourteen miles west of Lancaster. Already about eighty acres of ground have been opened up, the pay streak being three feet in thickness. The value of the gravel, according to pan test, is given at from \$2\$ to \$10 a cubic yard.

Machinery was ordered this week from a local concern, and it will cansist of a eight-horse-power engine, fitted on heavy sleds, with windlass scrapers, and a mill fitted with screens to separate the coarse and fine material. A Huntington mill will be used for amalgamation.

The water problem is an easy one to solve in that part of the country, and it is stated that on this particular property there are everal live springs. The work about to be launched is the first systematic attempt made to develop the placer grounds in the valley, where there are numerous prospects. The presence of some important quartz mines in the vicinity is one of the favorable indications that has not been overlooked by placer prospectors.

CANANEA STRIKE HURTS. CANANEA STRIKE HURTS.

Private advices from Cananea are to the effect that the great copper camp is anything but lively. Since the strike the railroad and furnaces have been closed, and there are many men out of employment. For the past three months the company has been reducing wages in every department, and in consequence hundreds of American miners have quit, their places being filled by inexperienced Mexicans.

Six months ago business in the camp was booming, but now everything is stagnant and business men are trying to get out and away. It will not be surprising if the shut-down of the Cananea copper smelters will have a builtish effect on the market.

JEROME PROSPECTING.

"Dlamond-drill work on the Jerome belt will soon demonstrate at what depth the ore bodies lie between the United Verde mine and Equator Hill," says the Jerome (Aria.) News. "It is an open secret that the ore bodies in the United Verde mine gradually sink deeper below the surface as they run south, and the dip is so strong that it

is possible it may be necessary to so down 1000 or 1500 feet before the main ore bodies are struck, while at places a depth of 400 or 500 feet may open up a pay mine, but there cannot be any possibility for a doubt of the existence of ore in paying quantities between Jerome and Equator Hill. and where these bodies are located and the most rapid and cheapest way to set at them can be quickly learned through the agency of a diamond drill.

Word comes from Riverside, Aris., that the Shoemaker and Ingram copper claims, two miles below the railway station, have been bonded to Boston people for a large sum.

An American company is reported to have offered over 1300,000 for the San Juan mine near Santa Eulaila, Chinahuahua. This property is considered one of the best producers in the Santa Eulalia camp.

Will Clear Bulacan and Rizal of the Disorderly Elements.

(BY THE ASSOCIATED PRESS—AM.)

MANILA, Feb. 10.—[By Manila Cable.] The government is preparing to theroughly round up the disorderly elements in the provinces of Bulacan and Rizal, where the constabulary, in accordance with orders from the War Department, will be reinforced by several companies of native acouts. The rumors from the disaffected provinces are believed to exaggerate the number of hostiles, of which it is said there are 2000 in the field. More trustworthy reports say there are not over 500 natives under arms, and that the bulk of these scattered after Sunday's fight. It is believed that the chief difficulty will be in cornering them. There is little doubt that the hostiles will be speedily suppressed.

The Filipinos who have been participating in the exposition at Hanol, capital of Tonquin, the French possession in Asia, have been ordered to withdraw, owing to a series of fights and to the friction which has existed between them and the French officials. The government of the Philippines may ask the authorities at Washington to direct the attention of the government of France to the incident.

GREAT IN SPITE OF PARENTS.

The boy Arkwright was compelled to become a barber's apprentice because his parents were totally isnorant of his ability in another direction, but nature had locked up in his brain a wonderful device destined to bless humanity and to de the drudgery of millions of England's poor. So he was obliged to say "hands off" even to his parents. Schiller was sent to study surgery in a military school in Stuttgart, but secretly produced his great play, "The Robbers." To him the military achool was like a prison. He longed for the life of an author, and he ventured in to the inhospitable world of letters because his bent spoke so loudly in his blood that he could not refuse to follow it. Ole Bull's father tried to smother his boy's genius for music by severe punishment because he happened to want him to become a minister. Dr. Handel would have quenched the aspiration of his son to make a lawyer.

Why do parents continue to wreck the careers of their sons and daughter because of their preconcived ideas of what their children should do? The parent has no right to ask "What do I wish my child to do?" He should ask rather, "What is my child best fitted for?" "What is my child best fitted for?" What is my child best fitted for?" What is my child best fitted given in his mental or physical make-up as to the career he should follow?"

Many of the saddest tragedies in hu-

ment and difficulties in preparing myself to fulfill adequately the duties of
this position? Have you a faculty for
buying and selling, or do you incline
to the tranquii life of the country?
sare you happy on the farm? Do you
delight in experimenting, by mixing
brains with the soil, studying the
chemistry of mother earth? Do you
like to examine mechanics' tools and
to draw? Do you like to solve problems in arithmetic or to memorize famous poems and speeches? Do you like
to impart to others what you have
learned by reading and studying, and
are you successful in doing so?
These are only a few of the hundreds of questions you may ask yourself in trying to determine what nature intended you for.
CHOOSE ENNOBLING CAREER.

If you have practically decided upon

CHOOSE ENNOBLING CAREER.

If you have practically decided upon your vocation, study the character of the people you know in it. Does the occupation elevate those who follow it? Does it broaden them? Is it a vocation in which you are likely to grow, which will make you a larger and truer man, or does it tend to dwarf and cramp and demoralize the people connected with it? Do not think you will be the great exception to the rule and that you can enter a questionable vocation without becoming a victim to it. In spite of all your determination it will seize you as in a vise and will stamp its indelible impression upon you.

Positively refuse to go into an occupation which will dwarf your manhood, cramp your intellect jor blunt your finer sensibilities. One of the saddest things in the world is to see a young man, strong, healthy, vigorous and well educated, prostituting in a questionable vocation the great powers and forces which God has given him. "True dignity, pleasure and poace," says a writer, "are utterly impossible to, him who voluntarily abuses himself and others by doing work that tends to poison human enjoyment and to destroy the welfare and usefulness of his fellow men. Whatever is harmful and corrupting is to be shunned as a deadly plagu."

Whatever you undertake in life, it is certain you will never do your best, is certain you will never do your best,

that weakness. It would be a sin to put himself in a position where the rasping and tearing-down process would be likely to wreck his nervous system. Harmony increases life force, but discord inspairs it. A discordant condition tends not only to shorten life, but to impair efficiency. Whatever you do be sure to get into harmony with your work and keep out of discordant environments. It you have defective sight you should be cageful about entering occupations such as engraving, book-keeping, proof-reading, dressmaking or any other work that requires close or constant uset of the eyes. Many young people who would be well and happy on a farm of in some active position have ruined health and happiness behind a counter in the city or in some sedentary position against which nature has entered her everlasting protest.

Thousands of people have been obliged to drag weak and feeble bodies through life, in constant suffering or misery, because they engaged in occupations which agaravated their natural physical weaknesses or defects which might have been entirely remedied had they chosen vocations for which they were by nature fitted.

THE CITY IN BRIEF.

The Los Angeles Catholic Benefit association held a smoker last night at their hall, No. 119½ South Spring treet. A musical and literary programme was rendered, and several of the city clergy were present.

A solemn mass of requiem will be lebrated in the Church of St. Vinnt de Paul, at 3 o'clock tomorrow orning; for the repose of the soul of a late Father Meyer, who was for any years connected with St. Vinnt's College, and who died while iding the position of president of a college. At 17:20, La Maripos Club II have a low mass said for Father yer at the Cathedral of St. Vibiana, a being the anniversary of his ath.

Very Rev. J. S. Glass, president of St. Vincent's College, was called East last week to accompany the remains of the late Father Kendrick, C.M., to St. Louis for interment. This aged priest, who but recently visited the Vincentian Fathers here, met death by falling from his train. Father Glass is expected back from St. Louis this week, and upon his return plans for the improvements at St. Vincent's College, will be approved, and work will soon begin.

Reward for Cos.

William Sowards, the oldest control of the improvements at St. Vincent's College. Will be approved, and work will soon begin.

William Sowards, the oldest son of James M. Sowards, the money lender who was murdered on the afternoon of James 30, by Martin E. Cox, yesterday, authorized Chief Elion to offer a reward of \$500 for the arrest and conviction of the fugitive murderer. Yesterday afternoon, the body of the murdered man was taken to Greenup, Ry, for interment. As it is a practical certainty that the local police department will have no hand in the capture of Cox, the reward will have but little effect; except in other cities, to which he may have fied.

Orchestra Ceacert.

On the occasion of the fifth complimentary concert by the First Methodist Sunday-school Orchestra, last night, the large auditorium and gallery of the church were filled. This orchestra, under the leadership of Earl B. Valentine, has made rapid progress since its last appearance, and the audience gave every evidence of appreciation last night. Solo selections were rendered by Mr. Valentine on the violin. Emil. Erickson on the cornet and Walter L. Ross on the saxaphone, and all were encored. Two recitations were given by Maurice Walton, in a semi-humorous vein, which were well received. Dr. McIntyre, who was to have made an address on "Music in Relation to the Church," was unable to be present on account of illness. The orchestra will give a concert at Long Beach on Friday evening.

City Attorney Mathews' is preparing

it is expected, will be made in April.

that there will be any delay in carrying out the project.

Selection of a site for the building
already has had informal attention of
school officials and members of the
Board of Education, but the matter
has not yet reached even a preliminary
stage looking toward the acquirement
of suitable property. In fact, there
is some question as to whether the
Council will purchase the land or
leave that to the Board of Education.
It also is not settled as to what funds
shall be used for the acquirement of
a site-whether it shall be paid for
from the proceeds of the bond sale or
from the general school fund.

No plans for the building have yet
been considered. They cannot be until it is known just how much can be
expended for that purpose. If the
site is to be paid for from the \$200,000
raised on the bonds there necessarily
will be a much smaller amount for
the building.

WHERE WILL IT STAND?

WHERE WILL IT STAND?

Where will it stand?

However these matters may be arranged, the question of location of the school is the one that has first place in the minds of the people.

They want to know whether it is to be placed in a cemetery or in an amusement park; is the business or in the residence section; up on a hill or down in a hollow.

south of Tenth street.

The great objection so far found to the two sites named is their great cost. The purchase price of either if it were to be paid from the \$200,000 fund, would leave too small an amount, it is thought, to build and equip the manual training school on proper lines, and there is no likelihood that mone? enough could be obtained from any other fund for the purpose.

FIESTA PARK FAVORED.

FIESTA PARK FAVORED. "The Polytechnic High School nat-

"It has been suggested," said Assistant School Superintendent Tritt,
"that a large building be placed on
the grounds of the Spring-street
school, between Fifth and Sixth, and
that part of this structure be used
for the Polytechnic High School, leaving the remainder for business purposes and for headquarters for the school, between Fifth and Sixth, and for the Folytechnic High School, leaving the remainder for business purposes and for headquarters for the post of the second of the second to the post of the second to the headquarters for the high that it would be better to see that it would be better to see the second in the southwestern part of the city. Too often in the past, as soon as it was learned that the city desired to was learned that the city desired to burchase certain property, owners and agents have raised their prices to an almost prohibitive figure, just because they thought they could get it. Under arrangements that are being perfected there will be no repetition of these methods. When a school site is destributed on condemnation proceedings will be instituted, and if the property callot then be purchased in the market at a reasonable price it will be condemned and a fair value be determined.

More first-class prise-ring events are pulled off in Los Angeles than in any other city of like size in the United States, or, perhaps, in the world. The average in the City of Angels is one fight every three weeks, and it is seldom that a big crowd fails to be on hand. The tickets of admittance range in price \$1. \$2 and \$3, and the average receipts for one fight are \$3200. In addition an average of \$7500 is bet on every one of these fights. Now the Southern Pacific has gone Now the Southern Pacific has gone the Santa Fé one better again on colonist rates. It has been announced heretofore that cheap rates from the East would prevail over the Southern Pacific, beginning February 15 and running to April 30 inclusive, at the expiration of which time significant rates were to be offered by the Santa Fé for two months. The announcement was made yesterday at local Southern Pacific headquarters that the time of seiling tickets at colonist rates would be extended to June 30. Thus will the Santa Fé have competition, after all. California will have the benefit of these cheap rates now for over four-months, during which time many thousand people will come to this Coast to settle.

DIED ALONE IN TENT.

The tent is located on a lot on the Dayton tract, beyond the terminus of the Temple-street electric road, having been purchased some time since by Sequin, on the installment gian. He was a consumptive carpenter, and had evidently determined upon living in that way in the hope of regaining his health, but the cool and rainy weather was too much for him, and it is believed that he died on Sunday night, though the discovery was not made until yesterday.

He had done some odd jobs of wappentry in the neighborhood, and had commenced the building of a more permanent place of abode for himself. He was found lying on a cot, fully dressed, and the tent contained a kit of fine carpenter's tools. There was a fireplace and an oil stove in the tent, though it seems that the only provisions he had were given to him by a neighbor on Sunday morning. The Coroner was notified, and removed the body to Bresse Bros. undertaking

Hill's Big Fortune. Col. Thomas A. Lewis got a divorce yesterday from Blanton Duncan's daughter. This is the last chapter of

the choicest morsel upon which gossip has fed for a long time.

The hearing of the divorce was a very mild affair. The ground was de-sertion. Col. Lewis testified that Mrs. Lewis left him, saying that she would never live with him again. Dr. Lew's, a brother of the plaintiff, said that Mrs. Lewis had told him the same

She was suing Joseph Thomas for divorce, on the ground of cruelty, and non-support. He had a counter charge of adultery against her.

She took the witness stand and told how Thomas had flourished a razor at her, and tore all the clothes from her because she went to a party, of which he did not approve.

When Judge Wilbur ordered the adjournment of court at noon, Mrs.
Thomas created a sensation by refusing to leave the witness stand. She said that her husband hid vowed to kill her if she won this suit. She also edified the court by displaying the torn lidgerie, which she brought wrapped up in a paper. She said her husband was a two-cent gambler, The case was not finished.

Two long and animated sessions of the Highway Commission were held at the Courthouse yesterday. There was a large attendance, both from the country and the city. The Executive Committee submitted a lengthy report, the first section of which, referring to the aligning and naming of four principal highways leading out of Los Angeles, was as follows:

"We recommend that the road leading northerly via Buena Vista street, Avenue 20, Tropico, San Fernando, Saugus, Acton. Palmdale, Lancaster and Mojave, to the Kern county line, be officially designated the San Fernando road: that the road leading easterly via Eastlake Park. Five-mile House, Ramona, El Monte, Puente, Lemon, Spadra and Pomona, to the San Bernarcino county line, be officially designated as San Bernarcino road: that the road leading southeasterly via Seventh street. Lagunar rancho, and Santa Fé Bprings, toward the Orange county line, be officially designated as the San Diego road; and that the road leading westerly via Wathington street and lay to the beach at Ocean Park be officially designated Wathington road."

The subject of block and house numbering was then taken up, A. L. Bancroft advocated a system perfected-by himself, and illustrated its workings by diagrams. "The subject was discussed at considerable length by Messrs. Currier, Griffith, Quinn, Boothe, Olmsted, Mason, Ekby, Davis and Knight, resulting in the adoption of the Bancroft system, with one modification, namely, the insertion of the exact number of miles within the circle at the top of all the milestone monuments. This leaves what is believed to be a nearly perfect system of biock and house numbering to be placed on each monument.

A monument was exhibited by Mr. Morrison of the Southern California Artificial Stone Company. Its dimensions were 4½ feet long, by 12 inches wide and 6 inches thick. It was made of three parts sand and one part cement, and is assid to se strong and tough. These monuments will cost, duly lettered and numbered, \$2 each at

FAMOUS HAYES ASKS

FOR A DIVORCE.

Charles Holcomb Hayes, who has kept the courts agog by getting himself into one sensation after another, varied the programme with a divorce suit yesterday.

He appeared in Judge York's court, asking for a divorce from Mayne Hayes, who is said to be an actress at the Globe Theater, London. He claimed that his wife declined to live with him. He could not give satisfactory proof of a year's desertion, and the court denied the divorce.

When she went on the stand, the court asked her some pretty pertinent questions about that old suit. She appeared almost stunned st the misortune of Hayes in not getting the divorce.

which makes the County Treasurer custodian of the funds of estates in the hands of the Public Administrator.

This suit was brought against former Public Administrator Kellogg, who has charge of the Hill estate. Mr. Kellogg has old Hill's \$120,000 in one of the banks. The county asks for a writ of mandarmus to compel him to turn over the money to the County Treasurer. If this is done, the county will get 1 percent. of the money for taking care of it.

Judge Allen has issued an order directing Kellogg to turn over the money or to appear in court, February 20, and show cause why he should not do so.

HIS WIDOW'S OPINION.

The estate of W. H. Broome, who was killed by N. M. Melrose at Acton, came into the hands of the court yesterday. Broome's widow filed a petition for letter's of administration, giving the value of the estate as \$10,000.

Broome's notorlous Actonoma oil stock, which indirectly was the cause of the murder, she put in as of "value unknown." It was this oil stock that made trouble between Melrose and Broome. Broome was exploiting the stock, and Melrose wrote letters East, asserting that the oil company was a fake.

Broome had 100,000 shares.

HOSSACK MURDER CASE. HOSSACK MURDER CASE.

DES MOINES (Iowa) Feb. 10.—The second trial of the famous Hossack murder case was begun at Winterset today, where it was taken on a change of venue from Indianola. The defendant, Mrs. Margaret Hossack, who is more than three score years old, was convicted a year ago, of having quarreled with her husband over a division of his estate, and with having killed him by splitting his head open with an axe as he lay asleep. She alleges that he had been murdered by robbers as he lay by her side, though she was not wakened until the assailants had escaped. The Supreme Court ordered a new trial.

revelations regarding the "barbarous system" prevailing among the guards regiments for the punishment of subalterns who are found guilty of social or military offenses.

According to Rear-Admiral Cochran, the colonel of one battalion has been in the habit of handing over offending officers to the senior subaltern. The latter summons a court-martial, at which the attendance of all the subalterns in exacted, and the sentence is almost invariably flogging. This is administered on the bare back, after the removal of all the clothing, and from six to forty blows with a cane are given with such severity that the lower number is sufficient to draw blood. All the officers present, even the most intimate friends of the victim, are compelled to administer their share of blows.

The admiral cites the instance of a young officer who fainted after receiv-

INTENSE INDIGNATION.

[BY THE ASSOCIATED PRESS—P.M.]

LONDON, Feb. 11.—The ditter of Rear-Admiral Cochran is republished throughout the press and has created throughout the press and has created threase indignation. Demands are made for a full inquiry into the cases referred to, and for a suppression of such diagraceful practices which are held to operate powerfully in the direction of the exclusion of a class of officers which the country needs, and which it so rarely gets.

Rear-Admiral Cochran, in an interview, declares that all his platements can be sworn to. "Those floggings," he said, "have been going on for years, and I hope and trust that this exposure will end them."

DR. O. C. JOSLEN.

I restore sound and permanent health to men afflicted with any of the ailments mentioned below. My methods of treatment embody all the knowledge gained by sixteen years' experience as a specialist in men's diseases, and my unequaled record of cures speaks for their scientific correctness.

Not "Weakness" **But Symptoms**

MANY MEN become weak early in life through errors, excesses, everwork or mental worry. They have Nervous Debility, Pimples, Lame Back, inflammation of Bladder and Kidneys, Despondency, Failing Memory, Loss of Ambition and other unmistakable signs of physical or mental weakness which absolutely suffit them for daily business, pleasure or marriage. But is this Lost Vitality?

"Weakness" is not a nervous disorder, demanding a tonic system of treatment, but is merely a system of chronic inflammation or congestion in the prestate gland. This congestion exists as a result of early dissipation or some impreperly treated contracted disorder, and requires carefully directed local measures only. By my own original hethods, the prostate gland is quickly restored to its pormal state, which results in full and complete return of strength and vigor. My cures are permanent because the condition responsible for the functional disorder is antirely removed, and I am convinced that by no treatment ether than my own carefully directed measures is a radical cure of this allment possible.

I am Always Willing To Wait for My Fee Until Cure is Effected.

Less Time in Curing Contracted Disorders.

I have reduced the time required for curi-contracted disorders about one-half. This as important solverment. If replac-danger with safety. It forestalls chron-complications. It removes the infectional and inflammation before that vital centers.

of Varicocele.

Under my treatment the most aggravated cases of varicocele are cured in a
few days' time. There is no pain and
it is seldom necessary that the patient
be detained from his occupation. Normal circulation is at once restored
throughout all the organs, and the
natural processes of waste and repair
are again established.

WORLD'S MODEL SHEEP RANCH.

AVALON, Feb 16.—The Banning Wool Company, through the Banning Wool of Santa Catalina Island the model sheep ranch of the world. A carload of fence posts as a starter has been received. The company will subdivide the entire Island into lots of large and smaller size, which will make it possible to round up every sheep and goat on the Island. Now, sheepshearing is a haphasard affair and hundreds of sheep escape the shearers every year, owing to the ruggedness of the ground and the vast territory over which they can roam. There are large tracts of the island so rough and by company intending to put in a modern roland they are only caught by means of traps, which are built about water holes. The work of fencing has already been begun, under the supervision of F. H. Lowe, and two lots of 2000 and 7000 acres respectively have been inclosed in the vicinity of Middle Ranch.

In connection with this fencing proposition the company has set apart a game preserve, which will be securely fenced off from the inclosures containing the sheep, and all the goats on the island will be turned into this preserve and kept there. This preserve includes a tract thirteen miles long, with an average width of one and one-half miles, and extends from the easterly point of the Island along the southerly shore to Little Harbor, embracking the whole east end as far as Avalon. Here the hunters will be runned loose.

DAZZLER ON A MOUNTAIN.

Strange Flashes on Heights Near Claremont Cause Much Wonder.

CLAREMONT, Feb. 10.-Half way up the side of the mountains north of town a strange light has shone the past few days and caused much wonder here. It is a dazzling spectacle sometimes flashing, and reached its maximum brilliancy at 10:50 o'clock in the morning yesterday and today.

The mysterious beacon is seen but a few minutes, but its flery brightness has attracted general attention in this vicinity, and there is a wide range of speculation as to its cause. The only plausible theory advanced is that it is the reflection of the sun's rays from a waterfall that has sprung from a crevasse. since the rains and snows have fallen. Whatever it may be it is a phenomenon that has never been observed here before.

Mrs. Emmons, saved from an operation for Ovaritis, tells how she was cured by Lydia E. Pinkham's Vegetable Compound.

"I suffered for over five years with ovarian troubles, causing an unpleasant discharge, a great weakness, and at times a faintness would come over me which no amount of medicine, diet, or exercise seemed to correct. Your Vegetable Compound found the weak spot, however, within a few weeks—and saved me from an operation—all my troubles had disappeared, and I found myself once more healthy and well. Words fail to describe the real, true grateful feeling that is in my heart, and I want to tell every sick and suffering sister. Don's dally with medicines you know nothing about, but take Lydia E. NERVOUS PROSTRATION. The Result of the Pain and Irritatio

from Homorrhoids. Nervous Prostration is often the result of neglecting a case of hemorrholds or piles; the pain and irritation attendant upon this disparation through the conveniences and annoys one, but it is possible to go to business and to do the ordinary day's work, so the trouble is meglected until the nerves become axhausted and the patient is a victim of nervous prostration.

tration.

Hemorrholds cause a sensation of heat, tension and itching in a region where is located
the most sensitive nerves of the human system and the continued irritation will eventually cause a collapse of the nerves. This
would easily have been avoided if the patient
had carefully treated the case of piles from
their first appearance. No other trouble can be
so quickly and safely overcome if treated in
an early stage; and even if the case is an old
one, there is a remedy which will act with
remarkable results if faithfully applied.

The Pyramid Pile Cure is in suppository The Pyramid Pile Cure is in suppository form and can be conveniently applied to the afflicted parts, the soothing oils and medication reaching and healing the enlarged hemorrhoidal veins of the rectum and acting at once upon the inflamed tissues.

at once upon the innamed tissues.

Every sufferer from this trouble should send at once to the Pyramid Drug Co., Marshall, Mich, for their book on Piles or Hemorrhoids, which will be sent free. The Pyramid Pile Cure is so well known and the hundreds cured by it have so advertised it that the little book is merely sent to give each patient a clearer view of his or her, particular cade and the aroner trantment for it.

The gardener at the San Francisco City Hall had rheumatism for many years-but now he is well and free from his oldtime pains.

Mr. William Mahoney, now and for several years past, head gardener at the City Hall, San Francisco, suffered matism in his legs. Mr. Mahoney tried every remedy suggested and at times would seem to improve. Most medicines, however, he found deranged his stomach, giving him indigestion and stomach pains until he was forced to

But Mr. Mahoney's friend, Corporal Parrott of the City Prison, had been suffering from rheumatism for years and was in a very painful condition when he took Uricsol and became cured, so he told Mr, Mahoney of the good results Uricsol had produced in his case and persuaded the

Since Mr. Mahoney took Uricsol he has been free to work and walk as much as desired-something he could

not do without pain for years. Mr. Mahoney can be seen any day at work on the lawn at the City Hall and is always willing to tell people of his experience with Uricsol.

Uricsol cures rhoumatism because it dissolves the urle acid and ninates it from the system—It also tenes up the stomach and the tive organs and renews the bodily forces.

Rheumatic sufferers of 30 years have been cured by six bottles. Just try it, anyway—see for yourself—surcease from torturing pain is well worth the trial.

treating for aliments that the patients haven't got.

Why \$5 seemed—I search out the exact cause of each disordered condition and guess at nothing. I make sure, then go ahead. My treatment restores and brings-back the power, merve power, which makes the vital organs act. All the skill that can be summoned and applied can never restore a weakness or functional decline till the nerves of these organs are made strong so they will perform their function. That is why common treatment fails.

Pay me when cured, which proves the reliability of my treatment.

Varicocele

Many have treated for this trouble and few have been permanently cured, there's a difference between a partial cure and one that is complete. I cure Variecoele in 4 to 6 days and there is no reliapse of the old "weakness" that accompanied the disease. The treatment I offer you is unequalled and the results are absolutely permanent.

Not by Mail.

My treatment is different, my methods and manner of

application are vastly different—and the results I obtain are surprisingly different to many.

THIS IS WHY I NEVER TREAT BY MAIL. Would you have some one guess at your condition, at the exact cause to be treated, and beside pay for it? And with no assurance that a cure could be had unless you can effect one yourself? And how sure are you that you can even treat your case unless you thoroughly uncerstand the conditions? All those things should be considered before you pay for guess work. I lease nothing to chance, for when I treat your case I will know just what to do to give you the quickest possible results. I cure more sasses in one week that can ever be cured by guessing through the mailt. I get at the "caret cause" leading up to the disorder and soon right matters with the right treatment applied the right way. Patients coming here for treatment are furnished rooms free of charge.

Ladies' New "1903" Gloves. Sale Of

Prices Less Than Other Dealers Pay at Wholesale.

Hamburger's is the only firm on the Pacific coast which imports all its own gloves direct thus saving middlemen's profits and consequently pricing them at retail lower than others pay at wholesale. Our entire line of new spring goods is now in and will be shown for the first time Wednesday. They are the best of accepted styles for this season's wear and you will especially note the new and pretty styles of embroidered backs on the higher classes of gloves. On several of these lines prices will be cut to below profit level in order to get your attention before the heaviest part of the season's traffic opens. This sale does not consist of a few dozen pairs but they are here by the thousands and are a larger stock than carried by all other local houses combined.
